Rietz, Allen Hills, Pa., writes: "I have used Foley's Honey and Tar for the past eleven years and I would not be without it." It promptly relieves hoarseness, tickling throat and wheezy breathing. F. LETTER FROM MEXICAN BORDER

Following is a letter from Russell Justice to his parents, Mr. and Mrs. R. M. Justice of Hickory. Mr. Justice, now on the Mexican border serving with the First Ohio Cavalry, graduated from the Normal college some years ago and is well known in Canfield and vicinity.

El Paso, Texas, Sept. 20, 1916.

We are now encamped about five or six miles from El Paso, Texas. We are located near Fort Bliss, the largest military post in the United States. There are about sixty-five thousand soldiers here now. I do not know how long we are going to be here, but, probably about two months. We certainly had a fine time coming down. We rode in Pullman coaches and we certainly had a nice trip. We got off once a day for exercise. We passed through all the big cities after dark so did not get to see what they were like. The cities of any size were El Paso, St. Louis, and Kansas City. After we got into the western part of Kansas there were no trees to be seen except occasionally around some ranch house. After we left Kansas City we got off the train and went in swimming. We left Columbus on Friday evening and got here Wednesday morning thus making the trip in five days.

For the first five days it rained every day but it was nothing more than a sprinkle. Since then we have had no rain. Everything here is sand, sand, nothing but sand. Our camp is about three miles from the Franklin mountains. Sunday before last Brownlee and I climbed up to the highest peak. It took us about two hours and a half. There are no trees here, just a few mesquite bushes and cacti. We can see for about a hundred miles. Looking to the south we see mountains fifty miles away and it only looks to be about 6 or 7 miles. The Franklin mountains look to be only a mile away instead of three. I do not notice the heat much. It is so dry that it is not noticed. There is a nice breeze going all the time.

We have our horses now and we are all satisfied. I have a nice little roan cow puncher's pony that certainly is a peach. He can go like the wind! There isn't another pony in the outfit that can pass him and he is as quiet as a lamb. He will follow me anywhere. One of these days I will get a picture of him and send it home.

We make a four mile ride out into the desert every day. This morning we saw some fine scenes. The only animals we have around here are lizards, horned toads and cotton tails. It gets dark quick here on account of the mountains which rise from the surrounding country some 2000 feet.

After a week of much and varied work I again find time to continue this letter. I am so busy that I can hardly find time to eat and sleep. We have to care for our own horses besides taking care of the sick and injured. Several of the fellows have been kicked but none of them were hurt seriously, only bruised a little. I am in splendid health and have been ever since I have been down here. We go out riding five hours every day and we can go anywhere we please. In these rides we see some odd sights which are peculiar to this part of the country. The other day we saw a lit- tle burro with three kids on its back and they were making him trot right along. They are very innocent looking beasts. We are taking a number of good pictures and I expect to have about three dozen nice pictures of different oddities. Your son,

RUSSELL JUSTICE.

DAVID LUBIN ADVOCATES RE-ELECTION OF WILSON.

DAVID LUBIN ADVOCATES RE-ELECTION OF WILSON.

Father of American Rural Credits, Another Leading Republican, to Join President's Standard.

David Lubin, founder of the International Institute of Agriculture and father of the rural credits movement in America, has joined the list of prominent Republicans openly advocating the re-election of President Wilson. Within a fortnight Thomas A. Edison, Luther Burbank and Henry Ford, all Republicans and men of international fame, have done the same.

David Lubin is a wealthy California farmer. His interest in securing a square deal for the farmer led him to make research abroad, and out of his efforts grew the International Institute of Agriculture at Rome. This institution does for the staples of agriculture of the world what the American chamber of commerce does for the products of the American manufacturer.

Through his connection with the institute he became interested in the

rural credit systems of Europe and led the movement which resulted in the passage of the Rural Credits Act by the Wilson administration.

Just before departing for Italy recently, Mr. Lubin authorized an interview of 4,000 words in which he gave his opinion of those acts of the Wilson administration which directly affect the farmer. This has been furnished without cost to every leading farm paper in the United States. If the farmer does not read it in his farm paper it will probably be because the editor does not care to use his columns for discussion of economic questions and government policies that vitally affect the farmer.

Mr. Lubin said: "In the application of business methods of distribution, America, until the present administration, was about 150 years behind Germany and several decades behind the rest of Europe. And yet in the very thing in which America is backward she should lead the world. She does not, because a clique of special interests dictated public opinion and controlled legislation through the bosses of the Republican party. So cleverly have they worked that the average man is hypnotized, his critical faculties dulled.

"President Wilson is neither fooled nor led by this crowd. He is tireless, patient, farseeing. He has a historic sense of the past, a sympathetic sense of the present and a prophetically spiritual sense of the future. While his head is above the clouds, his feet are always upon the earth. He is idealistic on the one side, on the other practical. He is a good business man. "He knows that good politics and good economics are the same thing. He is fearless; in all my relations with him, direct or indirect, I fail to find anything or anybody he is afraid of."
